We introduce Side Views, a user interface mechanism that provides on-demand, persistent, and dynamic previews of commands. Side Views are designed to explicitly support the practices and needs of expert users engaged in openended tasks. In this paper, we summarize results from field studies of expert users that motivated this work, then discuss the design of Side Views in detail. We show how Side Views' design affords their use as tools for clarifying, comparing, and contrasting commands; genera ...

2 [Own your own color print shop for fun and \(a small\) profit](#)

Christopher Jones

 November 2002 **Proceedings of the 30th annual ACM SIGUCCS conference on User services**

Publisher: ACM Press

 Full text available: pdf(102.13 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The School of Architecture and Allied Arts at the University of Oregon runs its own color print shop for students, faculty, and staff. This paper and poster provide details of its operation. We offer printing on a color laser printer and four large-format inkjet printers, between 24 and 42 inches wide. All printers are served through an AppleShare IP server, which will be upgraded to run OS X Server beginning in Fall 2002. All print jobs are placed on hold at the print server when they arrive. Cust ...
